

My handprint

Template M9

Increase the social handprint, reduce the ecological footprint. This is the idea of the handprint, which is to show what ideas and actions you can contribute to a good life for everyone.

Can you think of any areas where you are already contributing to making the world a better place? They can be small contributions, for instance, helping others or being environmentally conscious in your everyday life. Find inspiration by looking at the 17 United Nations Sustainable Development Goals. Choose one goal which you would like to work towards for the next couple of weeks. Then take a sheet of paper to draw your handprint on. Fill in the captions according to the template below and cut it out. You can then create a poster with your other group members on which you join together all of your handprints.
